Brentwood, TN – January 31, 2019 – EFC Systems, Inc. ("EFC Systems"), a leading provider of solutions for Agricultural Retailers and Growers, is pleased to announce that Jeremy Wilson has joined EFC Systems as Senior Vice President, Field Data Solutions effective February 1st.   In his role Jeremy will lead the division of EFC Systems responsible for the FieldAlytics and AgSolver solutions.

Jeremy comes to EFC Systems from Crop IMS where he spent 12 years as Technology Specialist.   Prior to Crop IMS Jeremy worked in Crop Insurance for 4 years before becoming a Crop Specialist for 7 years at Wabash Valley Service Co. Jeremy holds an Applied Science Degree in Agriculture Production and Degree in Business Management from Eastern Illinois University.

 "We are pleased to add Jeremy to our leadership team as we increase our presence in serving Ag Retailers and Growers." said Ernie Chappell, Founder and President of EFC Systems. "Jeremy is not only well known / well respected in the industry but also well aligned with our vision on how our solutions can help grower profitability and bring more value to the service provider to grower relationship.

 "Jeremy has been a tireless evangelist for advancing technology solutions to help production farming practices" said Don Bierman, CEO of Crop IMS.   "We wish Jeremy well and are pleased to support Jeremy in this new role and the path he and EFC Systems are taking in bringing practical tools to the market for farm profitability."

About EFC Systems, Inc.
EFC Systems, Inc. was founded in 1988 and delivers comprehensive technology solutions to agricultural retailers both for E.R.P. (Enterprise Resource Planning) as well as F.D.S. (Field Data Solutions).   Their solutions support advanced farming practices and enable seamless data connectivity among growers and their agricultural service providers. EFC Systems has been providing agribusiness solutions for more than 27 years.   Corporate headquarters are located in Brentwood, Tennessee.   Visit www.efcsystems.com for more information.
